To Order

The principle that supports the use of hand stimulators is that whatever is done to stimulate the hands has its corresponding action in the body. Hand Stimulators are used:

- To prepare the hand for accurate point finding
- To move blocked body energy and stagnation
- For self-treatment

<p>Aluminum Silver Color</p>		<p>Calming Made of aluminum with soft rounded surface protrusions that provide soothing stimulation for agitated, hyperactive clients.</p> <p>4.5 x 1.1 in</p>
<p>Aluminum Silver Color</p>		<p>Moderate Stimulation Made of a solid aluminum bar with pointed surface protrusions providing invigorating stimulation for most clients.</p> <p>4.3 x 1.1 in.</p>
<p>Heavy Duty Silver Color</p>		<p>High Stimulation Ideal for stimulating small areas like the fingers. Both pointed ends allow stimulation of individual acu-points and areas of stagnation and pain.</p> <p>4.5 x .5 in.</p>
